YARBRO “HANDS ON” NATURE CENTER

Green House Tropical Environment

Wetland Area with Pond

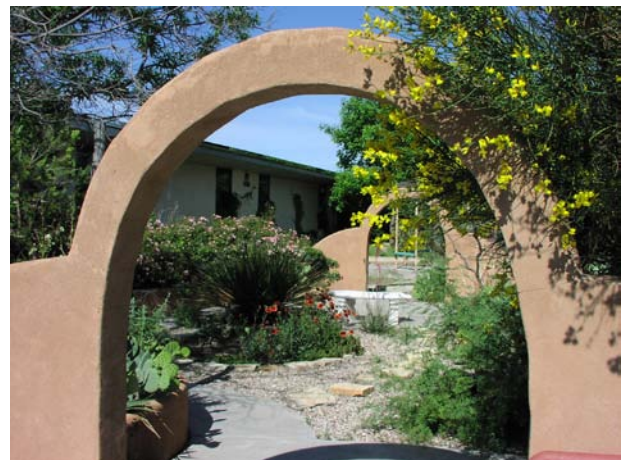

Forested Area

Desert Area

Archeological Dig Area

Arch Leading to Amphitheater

Amphitheater Seating

The Yarbro Hands On Nature Center is a project that the Sureste RC&D has been working on since 1994, with an initial grant of 25 thousand dollars from the Christa McAuliffe Fellowship, which assisted in building the Greenhouse Tropical Area. Since this beginning we have added different ecological areas. We are attempting to expose students to various eco-systems. This project truly became a community project. Several different groups and individuals either donated money and or time to see this area become what it is today. We currently are in the process of taking bids to construct a roof over the entire Amphitheater Area. We are hoping to have this completed before the end of the school year. This project is a perfect example of the things that can get accomplished if a community comes together for a worthy project. The RC&D, as always, was the facilitator and conduit to “Make This Happen”. For further information call 575-396-5857 #5.
