Perkins County Community Wildfire Protection Plan:

The Tatanka Resource Conservation & Development Council in collaboration with federal and state agencies, and local partners developed a community wildfire protection strategy. This includes a Community Wildfire Protection Plan, a Preattack Plan Map Book, and a Wildfire Brochure enabling the public to prepare and protect their community from wildfire.

This project was a joint effort of the area volunteer fire fighters, US Forest Service, Resource Conservation & Forestry Division, USDA Natural Resources Conservation Service, South Dakota Wildland Fire Suppression Division, Perkins County Emergency Management, Perkins County Commissioners, and the Tatanka RC&D Council. Black Hills Land Analysis developed and prepared the wildfire protection plan. Funding was provided by the Bureau of Land Management.

These plans were distributed to the fire departments and all the partners involved.
