

Skyline CWMA

The Castleland RC&D has been providing organizational support and serving as the fiscal agent for the Skyline Cooperative Weed Management Area (CWMA) since it was formed back in 2002. The Skyline CWMA is a collaborative effort of agencies and private landowners with the goal of controlling noxious weeds beyond jurisdictional boundaries. This year the Skyline CWMA completed 9 separate weed spraying projects in Carbon & Emery counties. The total acres treated during 2010 were over 2,000 acres. The CWMA also published another addition of the *“Weeds of Utah”* calendar as an educational effort, and distributed over 4,500 of them to communities throughout Utah. In conjunction with the Skyline CWMA, Castleland RC&D had a booth at the Utah Weed Control Association’s annual meeting to showcase its accomplishments and offer support to other CWMA’s in the state.
