“Another Bright Idea”

South Central Nebraska RC&D partnered with WasteCap Nebraska in 2010 to expand the “Another Bright Idea” program into central Nebraska. The program encourages the recycling of burned out compact and linear fluorescent light bulbs from area homes and businesses to reduce the amount of mercury and hazardous chemicals entering landfills. Collection sites are being established at participating retail and public locations across the RC&D area. To learn more about “Another Bright Idea”, go to: www.wastecapne.org/another-bright-idea.
